

Addition With Expanded Form No Regrouping

$$362 + 535 =$$

Directions - Expand the digits into expanded form and line up the numbers by place value. Add up the values in each column.

$$\begin{array}{r} 300 + 60 + 2 \\ + 500 + 30 + 5 \\ \hline \end{array}$$

$$800 + 90 + 7$$

Rewrite the answer in standard form

$$800 + 90 + 7 = 897$$

Answer - $362 + 535 = 897$

3-Digit Addition with Expanded Form Strategy No Regrouping

Example - Expand the digits into expanded form and line up the numbers by place value. Add up the values in each column. Then rewrite the answer in standard form.

$$\begin{array}{r}
 362 + 535 = 362 \rightarrow 300 + 60 + 2 \\
 \underline{+535} \rightarrow +500 + 30 + 5 \\
 800 + 90 + 7 = 897
 \end{array}$$

Directions: Solve the problems using expanded form strategy.
